EDUCATION

National Institute of Technology Karnataka, Surathkal
B.Tech in Computational & Data Science

August 2024 – April 2028
Karnataka, India

EXPERIENCE

Katha AI

June 2025 – Present

Developer

Industry Project under [Prof. Mohit P. Tahiliani](#), CSE Dept., NITK

- Developed core frontend and backend modules for an AI-powered storytelling platform using **React**, **Django REST Framework**, and **PostgreSQL**.
- Integrated **Cloudflare R2** for scalable media delivery and developed REST APIs for books, scenes, metadata, and AI-generated multimedia assets.

180 Degrees Consulting, NITK

Sep 2025 – Present

Developer

Mangalore, India

- Built and deployed **full-stack web applications** for real-world clients using modern web technologies.
- Developed backend APIs, managed databases, and automated deployments using **Docker** and DevOps workflows.
- Collaborated with cross-functional teams to deliver scalable, production-ready software solutions.

PROJECTS

OpportuneAI | *FastAPI, LangGraph, Redis, RQ, PostgreSQL, Playwright*

Jun 2026 – Present

- Architected a modular job aggregation platform processing **100+ listings/day** from multiple providers with content-hash deduplication using **FastAPI** and **PostgreSQL**.
- Built an asynchronous AI pipeline using **Redis Queue (RQ)** for background LLM extraction and scalable provider-based job processing.
- Developed **LangGraph** agents for resume-aware job ranking and human-in-the-loop application automation.

Railsplit — Smart Train Seat Finder | *FastAPI, Playwright, React, Redis*

Apr 2025 – Jun 2025

- Built a web app** to find confirmed train seats by intelligently splitting a single long route into two.
- Designed an **ellipse-based geospatial algorithm** for optimal intermediate station selection.
- Async backend** with Playwright, Redis caching, SSE, Firebase auth.

EXTRACURRICULAR ACTIVITIES

Web Enthusiasts' Club, NITK

Sep 2025 – Present

Systems SIG Secretary

- Promoted from **Systems SIG Executive** (Sep 2025–Mar 2026) to **Systems SIG Secretary** (Apr 2026–Present).
- Designed and managed the infrastructure for **WECCTF**, serving **400+ participants** using **CTFd** with support for static and **10+ Docker-based** challenges.
- Architected a **hybrid deployment** by combining institutional servers with a **remote Azure Docker Engine**, enabling scalable containerized challenge hosting.
- Built the **WECCTF Archive** with challenge write-ups and solutions.
- Contributed to the open-source **CTFd Docker Challenges Plugin**.

TECHNICAL SKILLS

Languages: Python, C++, Rust, SQL, HTML/CSS, JavaScript

Frameworks & Libraries: FastAPI, Django, React, LangChain, LangGraph, Flutter, SQLAlchemy

Databases: PostgreSQL, MySQL, SQLite, Redis

Cloud & DevOps: Docker, AWS, Azure, GitHub Actions, Cloudflare R2, Nginx, Git

Concepts: System Design, RAG, OOP, Operating Systems, Computer Networks, DBMS

ACHIEVEMENTS

- Secured **2nd Place** at the Engineer's Day **Hackathon** with an **AI-powered healthcare platform**.
- Won **1st** and **3rd** place in college **Capture The Flag (CTF)** competitions.
